

ARCHITECTURAL VISUALIZATION

The Architectural Visualization Skill Award is to train the student in the fields of Perspective Drawing and Descriptive Geometry. This will enhance the students' skill in visualizing an architectural structure. Introductory training in the SketchUp and Rhinoceros software is also included. Upon completion of this skill award, the student will be able to create drawings needed for the preliminary design of an architectural project.

Required Courses

ARCH 101	Basic Drafting and Design	3 units
ARCH 103	Descriptive Geometry	3 units
ARCH 105	Perspective Graphics w/Introduction to SketchUp and Rhinoceros	3 units

Total Semester Units 9

Note:

Arch 103 and 105 requires the completion of the prerequisite class, Arch 101. (The student may enroll in both classes at the same time with instructor permission.)
