## Questionnaire for Students Requesting Third Enrollment in a Biology Class

We are asking you to complete this form for three main reasons:

- First, we want you to be successful in this course and in your educational goals.
- Second, it is important that you think about what prevented you from passing the class in your two previous attempts. Was it your study skills? Life/personal challenges? Both?
- Third, your biology instructor would like to know about your study habits and time management skills, which are key ingredients for student success.

Your response to this questionnaire will help guide a discussion with your instructor, so they can provide guidance that may help you succeed this semester.
